Basic Information

- Place of Origin: Shangdong, China
- Brand Name: Changyue

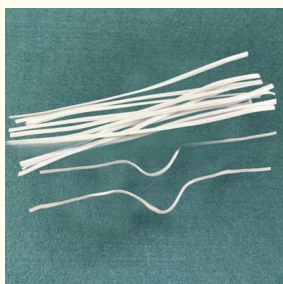

Product Specification

- Features: Automatic Feeding, Cutting, And Inserting Of Nose Wire
- Power: 1.5KW
- Loading Port: Qingdao Port
- Assembly Structure: Separate Type Extruder
- Feeding Mode: Multiple Feed
- Dimension: 3500*900*1680mm
- Screw: Single-Screw
- Automation: Automatic

Product Description

Product Description:

The Changyue trademark guarantees the durability and reliability of this machine, making it an excellent investment for any business. The Automatic Feeding, Cutting, and Inserting of Nose Wire features ensure that your production process is efficient and streamlined.

With a power rating of 1.5KW, this double core flexible nose clip making machine is designed to handle high volumes of production while maintaining its reliability and accuracy. The separate type extruder assembly structure ensures that your machine is easy to maintain and operate.

Investing in the Plastic Nose Wire Production Line from Changyue means that you can produce high-quality nose wires for face masks with ease. The Automatic Feeding, Cutting, and Inserting of Nose Wire features ensure that your production process is fast and efficient. Don't settle for less - choose the top-quality PP Nose Wire Making Machine from Changyue today and experience the difference!

Features:

Product Name: Face Mask Nose Wire Machine

Automation: Automatic

Product Type: Strip

Assembly Structure: Separate Type Extruder

Trademark: Changyue

Inverter Brand: ABB/Delta

This machine is a plastic nose wire production line that can automatically produce nose bridge strips for face masks. It is also known as a double core flexible nose clip making machine and a nose bridge strip production line. The machine is designed with a separate type extruder and uses high-quality components such as an ABB or Delta inverter.

Technical Parameters:

| | |
|----------------|--|
| Product Type | Strip |
| Trademark | Changyue |
| Material | Stainless Steel |
| Dimension | 3500*900*1680mm |
| Feeding Mode | Multiple Feed |
| Features | Automatic Feeding, Cutting, And Inserting Of Nose Wire |
| Motor Brand | WEG/Siemens |
| Inverter Brand | ABB/Delta |
| Automation | Automatic |
| Loading Port | Qingdao Port |

This is a plastic nose wire production line, also known as a PP nose wire making machine or nose bridge strip production line.

Applications:

The machine is equipped with a plastic nose wire Machine Extruder that is capable of producing high-quality nose bridge strips. The machine also has an automatic feeding system that ensures that the nose bridge strips are fed into the machine at a constant rate. This helps to reduce downtime and increase productivity.

Changyue Face Mask Nose Wire Machine is a Plastic nose wire production line that is equipped with advanced features such as automatic cutting and inserting of nose wires. The machine uses an ABB/Delta inverter brand, which ensures that the machine operates smoothly and efficiently. The machine has a power rating of 1.5KW, which makes it energy-efficient and cost-effective.

The machine is designed to be easy to operate, and it can be used in a variety of settings. It is perfect for use in factories that produce face masks, as well as in small-scale production facilities. The machine is also ideal for use in hospitals, clinics, and other healthcare settings where face masks are used frequently.

The Changyue Face Mask Nose Wire Machine is an automated machine that reduces the need for manual labor. This saves time and increases productivity, making it an ideal choice for manufacturers who want to streamline their production process. The machine is also equipped with safety features to prevent accidents and ensure that the operator is safe at all times.

In conclusion, the Changyue Face Mask Nose Wire Machine is a must-have for any manufacturer of face masks. It is a reliable and efficient machine that offers a cost-effective solution to the problem of inserting nose wires into masks. The machine is easy to use, energy-efficient, and safe. It is available for shipping from Qingdao Port, and it is designed to meet the needs of a wide range of customers.

Customization:

Support and Services:

The Face Mask Nose Wire Machine is a cutting-edge product that is designed to help you produce high-quality face masks with ease. . . . This machine comes with a range of technical support and services to ensure that you get the most out of your purchase. Our technical support team is available to help you with any questions or concerns you may have about the product, including installation, maintenance, and troubleshooting. We also offer training services to ensure that you and your team are fully equipped to use the machine to its full potential. In addition to our technical support and training services, we also offer a range of other services to help you get the most out of your Face Mask Nose Wire Machine. These include product customization, spare parts supply, and ongoing maintenance and support. With our comprehensive range of technical support and services, you can be confident that your Face Mask Nose Wire Machine will be a valuable asset to your business for years to come.

Packing and Shipping:

Product Packaging:

- 1 Face Mask Nose Wire Machine
- 1 User Manual

Shipping:

- Shipping Method: Standard Shipping
- Estimated Delivery Time: 5-7 business days
- Shipping Cost: Free
- Tracking Information: Available

FAQ:

Q: What is the brand name of this face mask nose wire machine?

A: The brand name of this machine is Changyue.

Q: Where is this machine made?

A: This machine is made in Shandong, China.

Q: What is the output capacity of this machine?

A: This machine has an output capacity of up to 120 pieces per minute.

Q: Does this machine come with a warranty?

A: Please check with the seller for warranty information.

Q: What type of material can this machine work with?

A: This machine can work with various types of materials, including plastic, metal, and aluminum.
