

Deep Screw Channel Structure PVC Foam Board Production Line for Benefit

Our Product Introduction

more products please visit us on plasticextrudersmachine.com

Basic Information

- Place of Origin: Shangdong, China
- Brand Name: Changyue
- Certification: CE
- Minimum Order Quantity: 1 set
- Price: USD 70000
- Packaging Details: Wooden box packaging
- Delivery Time: 30 days
- Payment Terms: T/T L/C
- Supply Ability: 10 sets/month

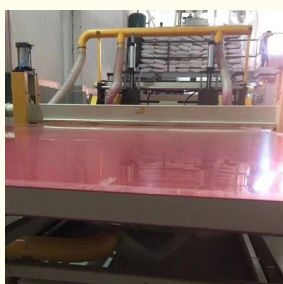

Product Specification

- Motor Brand: WEG/Siemens
- Plastic Processed: WPC PVC
- Calibration Table Length: 6 M
- Package Gross Weight: 15000.000kg
- Model No: SJSZ 92/188
- Condition: New
- Screw Size: 80/156
- Power Supply: 380V/50Hz
- Highlight: 80/156 pvc foam board line,
80/156 pvc foam board production line,
sjsz 92/188 pvc foam board line

Product Description

Product Description:

The calibration table length of this production line is 6 meters, which allows for the production of long and wide PVC foam boards. This is particularly useful for businesses that require large sheets of PVC foam boards for their products. Additionally, the package gross weight of this production line is 15000.000kg, making it easy to transport and set up.

The PVC WPC Plastic Foam Board Production Line is also equipped with a power supply of 380V/50Hz, which is compatible with most power grids around the world. This ensures that businesses can seamlessly integrate this production line into their existing operations without any additional modifications.

Automation is another key feature of the PVC Foam Board Sheet Production Line. This production line is fully automatic, meaning that businesses can rely on it to produce high-quality PVC foam boards consistently. This is particularly useful for businesses that want to reduce their labor costs and improve their production efficiency.

Overall, the PVC WAPP Plastic Foam Board Production Line is a reliable and cost-effective solution for businesses that want to produce high-quality PVC foam boards on a large scale. With its one-feed feeding mode, 6-meter calibration table length, 15000.000kg package gross weight, 380V/50Hz power supply, and automatic operation, this production line is ideal for businesses that want to streamline their production processes and improve their bottom line.

Features:

Product Name: Foam Board Production Line

Calibration Table Length: 6 M

Package Gross Weight: 15000.000kg

Screw Size: 80/156

Plastic Processed: WPC PVC

Power Supply: 380V/50Hz

This plastic PVC free foam board making machine is also known as a PVC foam board extrusion line.

Technical Parameters:

Feeding Mode	One Feed
Power Supply	380V/50Hz
Product Type	Extrusion Molding Machine
Origin	Qingdao China
Motor Brand	WEG/Siemens
Screw	Twin-Screw
Screw Size	80/156
Warranty	1 Year
Hs Code	84772090
Package Gross Weight	15000.000kg

Applications:

The Changyue PVC WPC Plastic Foam Board Production Line (Model No: SJSZ 92/188) is an automatic production line designed for the manufacturing of foam boards made from WPC PVC materials. This production line is manufactured in Shangdong, China and is certified with CE, ensuring that it meets all the necessary standards for quality and safety.

The PVC WPC Plastic Foam Board Production Line is suitable for a wide range of applications and scenarios. This includes the production of foam boards for use in the construction industry as insulation panels, wall cladding, and roofing materials. It is also used in the production of foam boards for use in the advertising industry as display boards, signs, and billboards. The production line is also suitable for the manufacturing of foam boards for use in the furniture industry as cabinet boards, wardrobes, and shelves. Additionally, it can produce foam boards for use in the automotive industry as dashboard panels, door panels, and seat backs.

The PVC WPC Plastic Foam Board Production Line is an ideal solution for companies and organizations looking to improve their production efficiency while maintaining a high level of quality. With a minimum order quantity of 1 set, companies can acquire this production line at a reasonable price of USD 70000. The production line is packed in wooden boxes to ensure safe transportation and has a delivery time of 30 days. Payment can be made via T/T or L/C, and the production line has a supply ability of 10 sets per month.

The PVC WPC Plastic Foam Board Production Line is highly automated, making it easy for operators to use and maintain. It is designed to process WPC PVC materials and has a power supply of 380V/50Hz. The production line comes with a 1-year warranty, giving companies peace of mind that they are acquiring a high-quality and reliable product.

Customization:

Support and Services:

The Foam Board Production Line is a highly technical product that requires specialized technical support and services. Our team of experts is available to provide assistance in the following areas:

Installation and set up

Training for operators and maintenance personnel

Technical troubleshooting and problem-solving

Regular maintenance and servicing

Upgrades and modifications

Supply of spare parts and consumables

We understand that downtime can be costly for our customers, so we strive to provide prompt and efficient support to minimize any disruptions to production. Our technical support and services are designed to ensure that your Foam Board Production Line operates at peak performance, maximizing efficiency and minimizing waste.

Packing and Shipping:

Product Packaging:

The foam board production line will be carefully packaged to ensure safe delivery. All components will be securely wrapped and placed in a sturdy wooden crate or box.

Shipping:

Shipping will be arranged by the seller and the estimated delivery time will be provided to the buyer. The foam board production line will be shipped via a reliable and reputable freight carrier to ensure safe and timely delivery.

FAQ:

Q1: What is the brand name of the foam board production line?

A1: The foam board production line is manufactured by Changyue.

Q2: Where is the foam board production line made?

A2: The foam board production line is made in Shangdong, China.

Q3: Does the foam board production line come with any certification?

A3: Yes, the foam board production line is CE certified.

Q4: What is the minimum order quantity for the foam board production line?

A4: The minimum order quantity for the foam board production line is 1 set.

Q5: What is the price of the foam board production line?

A5: The price of the foam board production line is USD 70000.

Q6: What are the packaging details for the foam board production line?

A6: The foam board production line is packaged in a wooden box packaging.

Q7: What is the delivery time for the foam board production line?

A7: The delivery time for the foam board production line is 30 days.

Q8: What are the payment terms for the foam board production line?

A8: The payment terms for the foam board production line are T/T or L/C.

Q9: What is the supply ability of the foam board production line?

A9: The supply ability of the foam board production line is 10 sets per month.
